

FNP Sales Analysis Dashboard

Project Overview

This Excel-based dashboard provides actionable insights into FNP (Ferns N Petals) sales data. Built using Microsoft Excel and Power Query, it visualizes key business metrics and trends to enhance decision-making.

Tools & Skills Used

- Microsoft Excel
- Power Query for Data Cleaning & Transformation
- Pivot Tables
- Interactive Slicers & Filters
- Bar & Line Charts for Data Visualization

Key Metrics

- Total Orders: 1000
- Total Revenue: Rs.3,520,984.00
- Average Order Delivery Time: 5.53 hours
- Average Customer Spend: Rs.3,520.98

Insights Extracted

- Highest revenue was generated during **Anniversary** and **Raksha Bandhan** occasions.
- Top-performing product categories include **Mugs**, **Soft Toys**, and **Sweets**.
- Sales peak during certain hours, showing strong hourly demand patterns.
- **March** and **August** recorded the highest monthly revenue.
- Most orders came from **Kolkata**, **Indore**, and **Gurugram**.
- The most revenue-generating product is **Designer Box** followed by **Chocolate Gift Pack**.

Purpose

To showcase data storytelling and dashboarding expertise using Excel. The project demonstrates how data can be transformed into strategic insights using Power Query, pivot tables, and visual elements.
